Technical Skills

Languages: Typescript, Javascript

Frontend : React.js, NextJS, Tailwind CSS, Refine, Zustand, HTML, CSS

Backend : Microservices, Node (Express and Nest), RESTful API

Database : DB Modeling, SQL(PostgreSQL), NOSQL(MongoDB)

DevOps: Deployment, AWS (EC2 and S3), Nginx, Docker and Docker Compose, VPS, Linux,

Professional Experience

OpsKube (360VITY INFOSOURCE PVT(OPC) LTD)

Sep 2025 – Feb 2026

Software Development Engineer I

Noida, Uttar Pradesh

- Contributed to the development of a scalable **EdTech platform** using **React**, **Refine**, **NestJS**, and **PostgreSQL**, building responsive user interfaces and backend services for learning and management workflows.
- Developed secure **authentication and authorization systems** with role-based access control for Admin and User modules, ensuring protected access across platform features.
- Built and optimized **Admin Panels and Dashboards** for managing users, courses, payments, and platform activities with efficient state management and API integrations.
- Integrated and maintained **payment gateway workflows**, handling secure transactions, payment status management, and backend validation processes.
- Worked on real-time **live broadcasting features** using **LiveKit** with React, enabling interactive live sessions and improving communication experiences within the platform.
- Implemented **user activity tracking and record management** systems for monitoring engagement, session activities, and platform usage analytics.
- Collaborated within a development team using Git-based workflows, contributing across frontend, backend, and deployment-related tasks in an agile environment.
- Handled deployment and server management on **VPS environments** using **Docker**, ensuring stable application hosting and streamlined deployment workflows.

Personal Projects

SlumberSpot - Hotel Booking Platform | [Github](#)

In Progress

- Developing a scalable full-stack hotel booking platform using React, NestJS, PostgreSQL, Prisma, and TypeScript with a Linux-based development workflow. Architected a modular backend with Prisma ORM integration, schema migrations, and centralized database services while establishing production-oriented infrastructure using pnpm and Git-based version control. Building real-time hotel discovery, booking workflows, authentication modules, and external travel API integrations, with planned Redis caching, Docker containerization, and AWS-based deployment and storage architecture.

ShopMate - Ecommerce | [View](#) [Github](#)

January 2025

- Created a full-stack MERN multi-vendor e-commerce platform featuring dedicated User, Admin, and Seller dashboards with secure Role-Based Access Control. Integrated real-time cart management. Focused on building a scalable, high-performance marketplace with a responsive frontend and a robust RESTful API backend.

Education

Manipal University

2023 – 2025

Masters of Computer Applications (MCA)

National Institute of Electronics and Information Technology

2022 – 2024

IT A Level (Spec. Full Stack Development)

University of Delhi (DU)

2018 – 2021

Bachelor of Commerce
